The richness I experience comes from Nature, my source of inspiration, solace and adventure. Its way of revealing wonders and surprises astounds: In colours, I see beatific smiles. In flowers, I enjoy heartening transformation. In stillness, I feel inner peace. Truly, Nature is Heaven under my feet and all around me.

Our Story

Greenlam
LAMINATES

Driven for Excellence

Among the world's top three producer of laminates, Greenlam Laminates brings a legacy of exceptional artistry, unsurpassed quality and unyielding passion for excellence to the table. With a production capacity of 24.5 million sheets every year, we have always ensured that superior quality products are available to you. Innovative technology and creative solution have been our guiding principles from day one.

Professionals such as architects, interior designers and end consumers can rely on us to immerse their decor ideas with elegance and character.

We have our team of over 4,500 employees and a network of over 20,000 dealers and distributors to thank for maintaining our level of excellence and commitment. Our esteemed list of clients inspire us to innovate and ideate towards delivering the best.

Sustainability Story

Responsible beauty

We believe creating beautiful spaces does not have to be at the expense of hurting our planet. At Greenlam, we're committed to fight climate change. For us, this means taking accountability by putting environmentally conscious production, practices and packaging at the centre of our business model.

Zero liquid discharge

We carry out continuous research, improvements and modifications in our processes to ensure that no toxins or pollutants in the form of liquids or emissions are discharged from our plants.

Responsible forestry

Our products are made from recycled or FSC* and PEFC** certified paper that come from sustainably managed forests, which contribute to combating climate change because of their capacity to remove carbon from the atmosphere and store it.

People- and environment-friendly products

Our laminate production is free of noxious asbestos, copper chromates, arsenate compounds, lead, heavy metals, urea, formaldehyde compounds and restricted hazardous substances. Our products are also compliant with the global emission standards of VOCs[^], formalin and other allied chemical constituents as part of our effort to maintain peak indoor air quality.

Effective waste management

The real-time monitoring of our resources significantly reduces processing costs, waste production and disposal expenditure. Together with our waste- paper recycling endeavours, we save 8,000 fully-grown trees every year.

Responsible logistics

We use only fuel-efficient and low-gas emitting vehicles to reduce carbon dioxide emissions.

Optimal indoor air quality

Stringent air monitoring and periodic tests ensure that our internal work environment is at its best.

Renewable energy utilisation

We procure various renewable energy resources, including biofuel and solar power, to be used in our laminate production.

Synthetic and petrochemical ingredient reduction

Where possible, synthetic and petrochemical ingredients are substituted with naturally occurring components derived from nature to further lower carbon and VOCs[^] emissions and enhance our laminate handling quality.

Energy and water conservation

We embrace methods that promote environmental protection and renewal, such as our pressurised hot water system designed to scale back groundwater withdrawal, improving energy efficiency.

*FSC: Forest Stewardship Council

**PEFC: Programme for the Endorsement of Forest Certification

[^]VOCs: Volatile Organic Compounds

Kraft Cores

01

Kraft Papers

All Greenlam laminates start with layers of A++ Grade kraft papers for durability.

02

Barrier Paper

Next, a sheet of barrier paper goes over the kraft layer. This precautionary step eliminates shadows cast by the kraft layer on lighter-coloured patterns, enhancing the brightness and sharpness of the design.

03

Decor Paper

The decor sheet follows the barrier layer. It features the prints and patterns on our laminates. Greenlam's diverse designs come from some of the world's best printers located in Europe. Our dedicated design team thoughtfully curates a collection of décor papers, spanning enduring classics, present trends and inspirations for tomorrow.

04

Overlay Tissue

Finally, each Greenlam laminate is topped with a layer of superior overlay tissue, which not only offers an exceptionally even surface colouration but also protects against abrasion levels higher than industry standards.

Environmental credentials

We are proud to exceed the industry benchmark in the area of green certifications. In particular, rigorous tests have shown that Greenlam laminates emit minimal levels of VOCs**, which have the potential to adversely impact the health of people that are exposed, and are certified to be suitable for use in environments where children may spend significant periods of time, such as hospitals and clinics.

*Forest Stewardship Council and Programme for the Endorsement of Forest Certification ^National Sanitation Foundation **Volatile Organic Compounds

Certifications

No compromises on quality

We care deeply about the details – of the products we create, and how we make them. Throughout Greenlam's entire manufacturing process, we apply the highest standards to ensure that the most exacting quality is attained, beginning with sourcing from suppliers who provide us with paper which is either recycled or made from responsibly sourced* timber, to collaborating with printers behind exquisite laminate designs.

The final result is a product that is consistent in quality, incredibly durable and warp-resistant.

Anti-virus and Anti-bacterial Protection

Greenlam laminates are treated with high-efficacy, anti-microbial agents, retarding and eliminating up to 99.9% of commonly found bacteria and viruses, including SARS-CoV-2, which causes COVID-19.

Fire Retardant

Greenlam laminates have been tested to achieve optimal fire-propagation reduction and surface spread-of-flame performance. Proof of certification is available upon request.

NSF Certification

Greenlam laminates are certified according to the NSF* food safety and environmental health standards, and are harmless upon direct contact with food.

A lifetime warranty
against manufacturing
defects comes with
all Greenlam
laminates.

The Greenlam Edit

THE GREENLAM EDIT

"Creating a collection means striking a balance between elegance, impact, and current trends. And that's exactly what the Greenlam design team has done with the latest collection - the Greenlam Edition 2023-2025. Drawing inspiration from the enigmatic and healing aspects of nature, we've infused this collection with the same essence.

Together, we've identified six prominent trends for the next few years, which you can explore in the following pages. Enjoy our latest creation!"

Mr. Didier Galerne,
Design Consultant

The Greenlam Edit – Collection of Inspiration & Interior Trends

Cosy Elegance

Cosy Elegance

An intensely arresting sanctuary outfitted with rich materials – theatrical marbles and walnut woods, curvaceous lines, and eclectic details in gold and brass – is at once romantic, ripe for intimacy and unabashedly opulent.

Patterns

02

With a wide range of patterns and textures, our laminates have been designed for every possibility. This ranges from naturally occurring stones like marble and granite to man-made materials like textiles and concrete. All the patterns on Greenlam laminates are the result of the layer of decor paper that is infused on the laminate. With our advanced printing technology, we are able to mimic the finest details of the materials we replicate, resulting in ultra-realistic surfaces that are almost indistinguishable from the original.

Can't find what you want?

Flex your creativity and customise your own designs. With Greenlam Custom Laminates, you can add your own print or pattern to our world-class laminates. Whether it's a large-scale photograph, a personalised illustration or a unique design, our superior digital technology allows you to convert your creativity into your very own unique laminates.

Woods

WOODS

03

The beauty of well defined wood grains will never go out of style. From quiet minimalism to bold masculinity, the secret of our ultra-realistic wood laminates lies in the precise colour tones and three-dimensional surface designs. Backed by our experience and knowledge in wood veneers, we are able to achieve the unique veneer look that give our laminates their distinct wood lines, swirls, knots and cathedrals.

Crown

Tangential cuts along the growth rings of the log produce crown cut woodgrain with a pattern that is characterised by straight grains intermixed with cathedrals. The looks of crowns and knots are bold and distinctive, giving a unique character to the woodgrain.

Partial Crown

Similar to crown design, it is cut vertically in the middle along with the ripple, leaving only half of the long, thin crown rings. The result is a woodgrain that has retained its natural look, with less complexity.

Straight

For those desiring simpler, clean design, straight woodgrains are the perfect answers. The lines have a slight wave, adding some variety to the pure wood design that come with no knots or crown.

Horizontal

Play with directions and have your woodgrains laid horizontally. These are great for on long horizontal pieces, drawing the eye down to highlight width, and at the same time avoiding joint lines on long vertical pieces.

Panel

The modular design gives a clean, stylish look across interior, amazing as a wall cover and equally stunning as a feature.

APPROVED, ACCREDITED
AND AWARDED

The quality of GREENLAM® laminates is acknowledged by authorities to conform to recognised high quality standards. We are proud to present the results here.

LD3-2005	Physical Properties	NEMA Requirement	Greenlam Value
	Thickness	0.8mm (VGS)	0.8mm (VGS)
	Thickness tolerance	+/- 0.1	+/- 0.1
3.3	Light Resistance (Xenon Arc)	SL, Slight Effect	NE, No Effect
3.4	Resistance to Staining	Sum of Score (20 Max)	9
	Cleanability	No Effect	NE, No Effect
	Stain 1 to 10	Moderate Effect	NE, No Effect
	Stain 11 to 15		
3.5	Boiling Water Resistance	No Effect	No Effect
3.6.3	High Temperature Resistance	Slight Effect	Slight Effect
3.7.2	Linear Glass Scratch Resistance	<20 / 50 / 100 / 200	<200
3.7.3	Diamond Scratch Resistance	1 / 2 / 3 / 4 / 5	3
3.8	Ball Impact Resistance	500mm	700mm
3.9	Dart Impact Resistance	200mm	700mm
3.10.2	Radiant Heat Resistance (Coil)	80 sec	188 sec
3.10.3	Radiant Heat Resistance (Strip)	80 sec	143 sec
3.11	Dimensional Change (Machine Direction)	0.70% (Max)	0.45%
	Dimensional Change (Cross Direction)	1.20% (Max)	0.72%
3.12	Dimensional Stability (MD)	0.60% (Max)	0.31%
	Dimensional Stability (CD)	1.10% (Max)	0.41%
3.13	Wear Resistance	400 cycles (min)	>750

- Manufactured in accordance with ISO 9001; tested by North Caronlina State Univeristy Wood Product Laboratory (with certificate), and meets or exceeds the requirements of NEMA LD3-2005.
- GREENLAM® Laminates also meet ISO 4586-1-1991 , BSEN 438 - 2 : 2005 & IS 2046 - 1995 standards.
- Laminates featured in this catalogue are available in size 1220mm x 2440mm x 0.8mm , unless otherwise stated.
- For any other sizes, please check with our team for more information.
- GREENLAM® brand of high - pressure laminate (HPL) has been certified by the GREENGUARD Environmental Institute (GEI) and was awarded the GREENGUARD Certification and GREENGUARD Gold Certification

LIMITED WARRANTY

Greenlam Asia Pacific Pte Ltd (GREENLAM®) warrants to the original Buyer that GREENLAM® High Pressure Laminates will be free of defects, under normal, proper and intended usage. within acceptable manufacturing specifications for a period of one (1) year from date of sale to the original Buyer.

Buyer's remedy in case of claims, as a result of defective High Pressure Laminates, shall be limited to only the replacement of High Pressure Laminates by GREENLAM®.

TRADE MARKS

GREENLAM®, the GREENLAM® logo and Safeguard™ Plus are registered trademarks of Greenlam Industries Ltd or its subsidiaries.

CHANGE OF SPECIFICATION

The company reserves the right to change specifications at any time without prior notice, It is recommended that you request actual samples prior to specification.

Maintaining the luminous shine and looks of GREENLAM® laminates is easy. Just follow these simple methods for optimal durability of the laminates:

CLEANING PROCESS

1. DAMP CLOTH OR SPONGE

A damp cloth or sponge is all you need. You can also use a mild soap or detergent to clean the surface.

2. DETERGENT

In cases of difficult stains such as coffee or tea, do not fret. These can be easily removed using a mild household cleaner or detergent.

3. BAKING SODA

If the stain becomes stubborn, use a little baking soda and water, and apply with a soft bristled brush. But remember excessive scrubbing or exerting too much force may damage the decorative surface, especially if it has a gloss finish.

PRECAUTION

1. HARSH CHEMICALS

Oven or drain cleaners will etch and discolour the decorative surface. If the product spills, remove immediately, rinse and wipe dry.

2. HOT OBJECTS

Protect the surface from the heat generating appliances by using a trivet or insulated pad. Prolonged exposure to high temperature may result in separation of the laminate from the substrate.

3. SHARP OBJECTS

Never use knives or other sharp objects directly on a decorative surface. Use cutting boards to protect the laminate top.

4. IMPACT

Be careful not to drop heavy objects or hammer directly on the surface. Even though high-pressure decorative laminates have excellent impact resistance, chipping or cracking may occur as a result.
